Summary

Full-Stack Web and AI/ML Engineer and B.Tech student proficient in React, Next.js, Node.js, FastAPI and LangGraph. Skilled in software engineering using Python, TypeScript, Java and C, with a strong foundation in Web Technologies & Native development. Passionate about building scalable, high-performance web and mobile applications.

Education

B.Tech in Computer Science Engineering (AI) — ABES Engineering College	2024–2028
Senior Secondary (Class 12), CBSE — Saraswati Vidya Mandir Sn. Sec. School	2023
Secondary (Class 10), CBSE — Surya Academy Sn. Sec. Public School	2021

Skills

- **Programming languages:** Python, JavaScript, Java, C
- **Tech (frameworks):** React, Next.js, Node.js, Express.js, FastAPI, Flask, Tailwind CSS
- **AI/ML Agentic Tech:** LangChain, LangGraph, LLM Integration (Groq, Gemini, Mistral)
- **Database & Caching:** MongoDB, Firebase, Redis
- **Cloud & Tools:** AWS, Docker, Kubernetes, Git, GitHub
- **Core Fundamentals:** Data Structures & Algorithms (DSA), OOP, DBMS, System Design, CI/CD Pipelining & Orchestration
- **Soft Skills:** Public Speaking, Team Collaboration
- **Languages:** English (Professional Working Proficiency), Hindi (Native Language)

Projects

1. Vibe Check – Distributed NLP & Sentiment Analysis Platform

[Git Hub Repo](#) | [Live Demo](#)

Python · FastAPI · Groq · Gemini · Mistral · Redis · MongoDB

- **Engineered an end-to-end sentiment analysis pipeline** utilizing **LangGraph** branching state machines to orchestrate multi-model accuracy benchmarks and isolate context shifts in unstructured feedback datasets.
- **Architected a high-throughput data layer utilizing MongoDB Atlas** for telemetry persistence, pairing it with **Redis** to cache repetitive inference patterns and eliminate redundant LLM API calls.

2. CampusEngage – Campus Engagement & Authentication Platform

[Git Hub Repo](#)

React (Vite) · Node.js · Express · MongoDB Atlas · JWT Auth · Render · Netlify · Tailwind CSS

- **Architected an end-to-end campus networking platform** featuring a highly responsive **React (Vite)** frontend and a decoupled, distributed **Express** backend API hosting complex dynamic routing structures.
- **Engineered a stateless authentication system utilizing secure JWTs**, configuring robust HTTP-only cookies, automated cross-origin resource sharing (CORS) white-listing, and environment-driven route protection guards.
- Optimized database scalability by migrating relational operations to MongoDB Atlas hosted clusters.

Hackathons

- **ABES Cloud Hackathon (2026)** : Secured **3rd Place** out of competing teams as the lead Full-Stack & AI Engineer. Architected an end-to-end cloud-native platform featuring real-time responsive interfaces and structured **LLM pipeline integrations**.
- **Battle of Brains Hackathon, ABESec (2024)**: Qualified for the advanced technical rounds following rigorous algorithmic evaluation phases.

Certifications

- CodeChef C++ STL - Standard template library [link](#)
- CodeChef 500 difficulty rating [link](#)
